“BEST CLASS” discrete products, integrated Circuits & Systems/Assemblies for customers project end-application requirements.

Active, passive and electromechanical components in QPL, upscreened or COTS-plus quality grades.

## OUR CUSTOMERS AND THEIR REQUIREMENTS.

### Partnership

Our goal is to be your co-worker. We listen carefully to your requirements.

The MSA team treats you and your requirements with respect, honesty and reliability.

Partnership means to us, we support them through the project lifecycle from RFTI to MRO.

### Support

You and your requirements take center stage of our efforts and you – as our customer – are the most important partner for us.

With our comprehensive knowledge, by understanding customer end-application requirements, we are able to propose beneficial solution to our customers.

Our team is always open for your questions and has an open ear for special needs.

### Flexibility

Our company size gives us the flexibility needed to meet your individual needs. You have the advantage by having one partner to solve your project needs.

### Our commitment

Our team does whatever it takes to get the job done.
